

KINDERMAN DE FREITAS BARROS

Android Software Engineer | Mobile Engineer | Android XR Developer

Manaus, Amazonas, Brazil | +55 92 98480-6039 | kindbarros@gmail.com |
<https://www.linkedin.com/in/kinderman-de-freitas-barros-34154988> | github.com/KindermanBarros

PROFESSIONAL SUMMARY

Android Software Engineer with experience in Mobile Development, Android XR, Embedded Android, and Research & Development (R&D). Skilled in designing and developing Android applications using Kotlin, Jetpack Compose, Clean Architecture, MVVM, and modern Android development practices. Currently developing Proofs of Concept (PoCs) for next-generation Android devices, smart glasses, and AI-assisted wearable technologies, validating emerging hardware platforms prior to commercial release. Strong background in mobile architecture, Bluetooth/BLE communication, hardware integration, Android XR, software quality, and scalable application development. Experience working in innovation environments through SIDIA and Instituto Eldorado, contributing to projects involving the Samsung and Motorola ecosystems.

TECHNICAL SKILLS

Android Development: Kotlin, Java, Android SDK, Android Studio, Jetpack Compose, Compose for XR, Android XR, Android Embedded, Material Design, Navigation Compose

Architecture: Clean Architecture, MVVM, SOLID Principles, Repository Pattern, Dependency Injection, Dagger, Hilt

Networking: REST APIs, Ktor, Moshi, NetworkNT, JSON Serialization

Data Persistence: Room Database, Firebase, MySQL

Connectivity: Bluetooth Classic, Bluetooth Low Energy (BLE), HID (Human Interface Device)

Testing & Quality: JUnit, Cypress, Jest, Test Automation, Software Quality Assurance

Tools: Git, Gerrit, Jira, Confluence, Docker

Cloud: AWS, Google Cloud Platform (GCP)

Additional Technologies: Unity, C#, React, TypeScript, Node.js, NestJS

PROFESSIONAL EXPERIENCE

Android Software Engineer

Feb 2026 – Present

SIDIA Institute of Science and Technology

Manaus, Brazil

- Develop Android applications using Kotlin and Jetpack Compose.
- Build Proofs of Concept (PoCs) for next-generation Android devices.
- Develop applications for AI-powered smart glasses and wearable devices.
- Design scalable solutions using Clean Architecture, MVVM, and Dagger/Hilt.
- Implement local persistence using Room Database.
- Integrate backend services and APIs using Ktor, Moshi, and NetworkNT.
- Develop Bluetooth Classic, BLE, and HID communication solutions.
- Prototype software for emerging Android hardware platforms before market release.
- Develop solutions for Android XR, spatial computing, and wearable ecosystems.
- Collaborate with multidisciplinary teams including software engineers, researchers, UX designers, and product teams.
- Manage development activities using Jira and technical documentation using Confluence.

Technologies: Kotlin, Android SDK, Jetpack Compose, Android XR, Dagger/Hilt, Room, Ktor, Moshi, NetworkNT, Bluetooth, BLE, HID, Jira, Confluence, Git

Mobile XR Software Engineer

Jan 2025 – Feb 2026

SIDIA Institute of Science and Technology Manaus, Brazil

- Developed immersive applications for Android XR devices using Unity and C#.
- Built Virtual Reality and Augmented Reality experiences for mobile platforms.
- Optimized rendering performance, memory usage, and responsiveness for Android hardware.
- Developed applications using OpenXR and XR Interaction Toolkit.
- Participated in projects involving Face Tracking, Spatial Computing, and Android XR technologies.
- Worked in multidisciplinary R&D teams focused on emerging technologies.

Technologies: Unity, C#, Android XR, OpenXR, XR Interaction Toolkit

Full Stack Developer

Aug 2023 – Sep 2024

Instituto de Pesquisas Eldorado Manaus, Brazil

- Developed enterprise applications using React, NestJS, and TypeScript.
- Participated in projects related to the Motorola ecosystem.
- Designed and integrated REST APIs.
- Applied Clean Architecture principles and software engineering best practices.
- Built responsive and scalable user interfaces.
- Performed code reviews and change management using Gerrit.
- Managed project activities through Jira.
- Collaborated in agile, multidisciplinary development teams.

Technologies: React, TypeScript, NestJS, REST APIs, Gerrit, Jira, Git, Clean Architecture

QA Intern

Aug 2022 – Aug 2023

Instituto de Pesquisas Eldorado Manaus, Brazil

- Developed and maintained automated testing pipelines.
- Automated testing for web applications and APIs using Cypress and Jest.
- Validated software systems and mobile devices.
- Supported software quality assurance processes and continuous improvement initiatives.

Technologies: Cypress, Jest, REST APIs, Git

QA Intern

Nov 2021 – Aug 2022

SIDIA Institute of Science and Technology Manaus, Brazil

- Executed quality assurance testing on Android devices.
- Used ADB for debugging and validation activities.
- Identified, documented, and tracked software defects.
- Improved testing workflows and validation processes.

Technologies: Android, ADB, Linux, QA

Software Developer

Mar 2020 – Nov 2021

Iontech Serviços Hospitalares Manaus, Brazil

- Developed and maintained the company's institutional website.

- Built internal Android applications using Kotlin and Jetpack Compose.
- Managed Ubuntu Linux servers and infrastructure.
- Developed software solutions to automate internal processes.

Technologies: *Kotlin, Jetpack Compose, Android SDK, Ubuntu Linux*

EDUCATION

Professional Master's Degree in Software Engineering 2025 – Present

UNIPAMPA

Bachelor's Degree in Software Engineering 2022 – 2024

FUCAPI

Technical Degree in Internet Informatics 2021 – 2023

CPET

CERTIFICATIONS

- Android Development Track – Samsung Ocean
- Motoacademy – Instituto Eldorado
- Motoacademy Web – Instituto Eldorado
- Hefesto Android Platform Project - UEA
- Advanced English Certification – ICBEU
- EFSET English Certificate (C2)

PUBLICATIONS

“Analysis of the Lack of Tools for Learning the Android Open Source Project in Portuguese” — XI Encontro de Computação e Sistemas de Informação, 2023

LANGUAGES

Portuguese — Native

English — Fluent (C2)

Japanese — Intermediate (JLPT N5)
